HAPPY NEW YEAR!

In many ways we are willing to predict that Nineteen Hundred and Eighty-One will be the best of years. Good times are on their way!

During the year we can expect appointment of a permanent President of the College, together with the pomp and ceremony such an Inauguration will bring.

Fresh drive and innovative ideas from our faculty and staff on both campuses will bring favourable attention to the College.

More day and evening students will be attending the college through the year.

Student body organizations will excel, with outstanding leadership and winners in state and national competition.

Excellence will abound!

How can we forecast such good news? Strictly by looking at our outstanding college community, and reviewing the achievements of the past. We have been notable in many areas before: we can and will do even better in 1981. We'll have a great year together!

REPORT ON THE PROJECT HOUSES

King's Row sub-division is gradually becoming honey-combed with Utah Tech project houses.

Three houses are being completed this school year, one of which - under the supervision of DelMar Stevens - should be ready by the end of March. However, Open House activities for all 3 projects will be toward the end of May.

None of this year's houses will be solar heated.

Foundations for two more houses are expected to be poured during Spring quarter. They will be built during the next school year.

UTAH TECH SICK LEAVE

Personnel Services Director Jean Workman reports that relatively few college employees take advantage of the benefit allowed in converting excess sick leave to vacation time.

An upcoming memo detailing the conversion allowable notes that each employee must make such decision by January 31st.

THIS DEPARTMENT IS A SURE SUCCESS

Cosmetology students held their annual Hairstyling contest during December, and came out with twelve department winners.

Incidentally, the program is popular enough that there is approximately a one-year waiting list of people desirous of entering the 12-month course.

And the word is that if the Governor signs into law a new proposal, cosmetology and barbering licensing will be combined. In which case both barbers and cosmetologists will be allowed to perform identical services. Currently there are some facets which are different.

CAN UTC EMPLOYEES SCORE...IN BASKETBALL?

Beginning January 5th, and thereafter every Monday night in the gymnasium of Eisenhower Junior High School, faculty and staff of Utah Tech are invited to play and cheer their teams.

The Downtown Campus already has a team going, and Redwood Road Campus faculty are getting into gear to form an unbeatable squad.

While various student and faculty teams will play every Monday between 6 p.m. and 10 p.m., most employee games will likely start right at 6 p.m.

Check with John Wiemer for further details.

SINGING THE BLUES

Not everything around the College is coming up roses, according to Mark Pratt, Security chief at Utah Tech.

Of great concern are the facts that during 1980 there have been reported more than 160 thefts; 18 burglaries; 19 vandalisms; and 5 assaults.

And the chief notes that the thefts alone amount to more than \$70,000.00. When one takes into consideration additional damage from vandalism, etc, the monetary loss to the college and campus community is very considerable.

Mark indicates he has a total of only 3 men available, whereas the national ratio of police personnel per thousand population is 2.8. At Utah Tech it is less than 0.5 per thousand.

What can be done? In an effort to be creative in solving the problem, chief Pratt is recommending a reserve officers program, in which he will select men and women to work voluntarily for the security force 20 hours a month.

Prevention through high visibility of security personnel is one major facet of Mark Pratt's plan.

PING-PONG, POOL...AND OTHER INDOOR SPORTS

College Center games room attendant Charles Johnson tells us of two upcoming tournaments - for free - open to all UTC employees in pool and ping-pong.

Check with the Intramurals Office if you are interested in entering the mixed doubles pool tournament, starting February 9th, or, if ping-pong is more your game, inquire about the doubles tournament beginning February 2nd.

Do you have a fiendish interest in the Asteroid video machine? Ask Charlie or Bart about how to enter that competitive game.

If your schedule is such that you can be at the Rancho Lanes by 4:30 p.m., join the UTC bowling leagues starting January 14th.

And - should you really have a burning urge to shoot - circle March 2nd at 2:30 p.m. for the Pistol tourney.

NEW VIDEO TITLING EQUIPMENT

Kelly Weldon, media technician, tells of recently receiving a Character Generator for use in creating titles on videotape. The Character Generator electronically puts titles on the screen, and will be of great value in further clarifying instructor-originated video programs.

If you have not previously considered making your own videotapes for classroom use, consult with Walt White, Dean of Instructional Support, and Kelly Weldon to define your needs and arrange studio time on campus.

NEW INTERIOR DESIGN CLASS PLANNED

A new Interior Design class will be offered this quarter on a trial basis as a community service.

Taught by Robert Eberhard the class is planned to run from 5:30 p.m. to 10:00 p.m. every Monday, Tuesday and Wednesday.

Instructors in the Architectural Drafting program will be eyeing the class closely. They want to see whether it may be an appropriate future option for their program.

As a continuing education class there will be no college certificate offered.

POLICE EVENING CLASS SCHEDULED

Beginning January 19 a 200-hour evening program will be offered in training of Police Officers Category 2. The program, offered as a service to the community, is to be taught by instructors from the Utah Police Academy. It is possible some related subjects might be presented by Utah Tech instructors.

Category 2 police officers are differentiated from first line officers (who are required to undergo formal police training at the Academy) in that they have police authority related to their area of responsibility only while on duty, or while in the presence of an offense.

Participants in the program may be security guards, correctional officers, constables and deputy constables, various types of investigators, etc. The course will be offered three nights a week for 3 to 4 hours per night.

The Police Academy will provide the individual's certification upon successful completion of the course.

HAVE WE GOT A DEAL FOR YOU!

No matter whether you are a beginner or an advanced skier, the College Center has a great deal for you and your family.

For \$48.00 per person you can take a 6-week ski school at Brighton. Each lesson begins at 5:00 p.m. and lasts 2 hours. Following that you have at least two more hours for fun skiing. Lessons are on Thursday evenings, taught by Brighton Ski School instructors.

The registration sign-up is scheduled for 5 p.m. on Thursday, January 8th in the College Center office area. An introduction to the program will be given, and all your questions answered.

John Wiemer indicates that any employee of the college, plus any family member, can participate in the program.

CLASSES AT THE CRAFTS CENTER

Depending upon the time you have available, you ought to think about a fun crafts class during these winter months.

UTC contract employees can register without fee, and classes are inexpensive to family members and friends. Of course they are all non-credit leisure time activities.

Just think of the fun and sense of accomplishment in working with clay-making pottery, or with stained glass, silversmithing/lapidary, tole painting, calligraphy or photography.

Kevin Frazier (ext. 4022) is the man to see. He'll be excited about having you join one of these classes!

HOME MAINTENANCE CLASS SCHEDULED

For those of us (male or female) who have difficulty in elementary plumbing, electricity, painting, caulking, weatherstripping and other household fix-it activities, the projected Homeowners Maintenance class will be exactly what we need.

To be taught by Easton Blake, this community service class will run during Winter quarter each Monday from 7 p.m. to 8:50 p.m. Cost is \$55.00.

If you can't afford to hire a professional to do the repair, maybe you need to get firsthand knowledge yourself. The course will likely pay for itself the first task you undertake at home...and there'll be the satisfaction that you "did it!"

DEFAULTS ON STUDENT LOANS PLUNGE

There has been a dramatic decrease over the past three years of defaults on student loans.

LeNae Williams, Collection Technician, notes that the school used to have one of the highest default percentages in the State - ranging around 28% of student loans three years ago.

A year ago the percentage had been reduced to 15.49%; currently it is at about 12.45%, which brings the institution below the State's average on defaults. And Mrs. Williams is hoping that by the end of the school year the college may be down to about 10% on student defaults.
