## PEOPLE 'N' THINGS

K.T. Magnusson is off campus for a two-week stint teaching for the prestigious Presidential Classroom organization in Washington, D.C. He is instructing about government to 40 high school students from across the nation. Presidential Classroom is a non-profit organization basically funded from private sources to improve understanding of the American way.

Dean Ann Erickson is named to this year's list of 100 top women in management participating in a nationwide leadership program financed by FIPSE (the Fund for Improvement of Postsecondary Education). Dean Erickson is also a panelist at the University of Utah's women's resource center next Tuesday, discussing "What Will You or Your Daughter Be in 2003?" And she is highly involved in next weekend's Math/Science Network's conference.

"The Seminars" organizer, JoAnn McCullough, will speak on "You Are What You Are" on March 1 at 7 p.m. in that series. And Thayne Robson, director of the U's Bureau of Economic and Business Research, is talking about the "Economic Climate of Utah" in The Seminars at 7 p.m. next Tuesday (22nd) in the Tech. building auditorium. Cost is only \$1 per person.

Wives of Bruce Hiatt and Pete Christensen have suffered serious medical problems. We wish them well during their recuperation period.

Chuck Woodbury was in Tucson, Az, recently looking at federal surplus, seeking aircraft component parts to help with the new Aircraft Mechanics program.

Don't forget to look in on the college employees' Art Show, on view in the Multipurpose Room in the lower level of the College Center. It remains in place until the end of next week.

Observing all the recent shuffling of offices, we can't help but comment on the stalwart work undertaken by Rich Hickman's custodial force. And the help engendered, too, by Guenther Prause and Don Rostron - college carpenter and painter respectively - cannot be ignored.

## TRAVEL LECTURE FEB. 23rd

The popular travel film lectures sponsored by the college continue with the next presentation on Wednesday, February 23rd, titled "South American Venture." The show begins sharp at 7:30 p.m. in the Technology building auditorium. Price is \$2 per person.

Attendance is gradually improving, with approximately 240 people on hand for the last lecture. Rudi Thureau, cameraman for the new film, is also an explorer, author and lecturer with a bent for high adventure.

## UTC FOUNDATION BOARD FORMALLY ORGANIZED

Announcement is now made of the initial membership, and officers, of the Utah Technical College Foundation.

The not-for-profit organization, which is fiscally and organizationally separate from the college, has as its principal purposes:

1. To receive private gifts, bequests, and donations, and to account for, manage and help appreciate monies or property submitted to the Foundation; and
2. To support programs and activities of the college which promote college objectives.

Elected as president of the foundation is Jack P. May, president, May Foundry Co. Robert F. Weyher, vice-chairman of Weyher/Livsey Constructors Inc, is vice-president of the group; and Dr. Orville D. Carnahan, president of the college, is the secretary. Burton A. Talmage, vice-president for development at Utah Tech, was named executive director of the foundation's board of directors.

At this point there are 13 other high-powered men who have agreed to serve on the board. They are:

Richard S. Prows, president, Prowswood, and chairman of the college's Institutional Council; John H. Klas, also a member of that council and vice-president of the Bank of Utah; Wayne H. Sandberg, state senator, and chairman of the board of Granite Mill & Fixture; Lorin K. Pugh, chief executive officer, Cummins International Diesel; Edwin L. Madsen, Jr., vice-president, Bonneville News Co.; Errol L. Phillips, president, Unified Financial Planners.

Also, J. Keith Adams, attorney, Van Cott, Bagley, Cornwall & McCarthy; Jack C. Alder, president, Alder Construction Co.; Bernard Tanner, president, Graphic Enterprises; P. Michael Gibbons, president and general manager, Gibbons & Reed Co.; John Langeland, president, Zions First National Bank; Abraham Markosian, president, Mark Steel Co.; and Robert H. Nickerson, president, Nickerson Co.

Other individuals will be invited to membership of the foundation board from time to time, with eventual membership possibly going as high as 30.

W. Harvey Sharron, Jr., currently dean for development at Santa Fe Community College, acts as a consultant to the college's development office. He has been instrumental in assisting 63 community colleges in development and organization of college foundations, and considers the UTC Foundation board of directors one of the strongest he has seen.

## ESTATE PLANNING SEMINAR SCHEDULED NEXT WEEK

Mr. Paul J. Barton, attorney at law and estate planning specialist, will present a short seminar on "Estate Planning for the 80's" next Thursday, February 24 at 3 p.m. in the Technology Building auditorium (room 203). The seminar is free to college employees and their spouses.

Co-sponsored by the Utah Technical College Classroom Teachers Association and Horace Mann Insurance, the seminar will cover such areas as wills, trusts, avoiding probate, joint tenancy, tenants in common, inheritance and estate taxes and problems, etc.

In suggesting that spouses come to the free seminar Mr. Barton notes that in over 80 percent of marriages the husband deceases first. Estate management may become a very difficult experience for the spouse.

## TUTORIAL FOR VISICALC

Business instructor Heber Moulton notes that the School of Business now has a tutorial for learning the Visicalc system on microcomputers.

Visicalc is an extremely flexible worksheet with an almost infinite number of uses. Additionally, it is a very easy introduction to using microcomputers.

Faculty and staff desiring to learn the system can pick up a tutorial in TB 107. There is some lab time open, usually in the afternoons. However, student demand is increasing rapidly, and they will have priority of use of equipment. "Come on down," says Heber, "before demand exceeds supply."

## FOR YOUR CALENDAR

Feb. 21 - President's Day (stay at home!)  
Feb. 22 - Big screen movie, "Fame"  
Feb. 24 - Big screen movie, "Coming Home"  
Feb. 25 - Utah Personnel & Guidance Association meeting on campus  
March 1 - Big screen movie, "Neighbors"  
March 3 - Big screen movie, "The Bedford Incident"

## ALSO

Feb. 24 - Free consumer law seminar on "Finding Security in 'Securities' Investments" at 6:30 p.m., Technology building auditorium.

## STUDENT CLUBS BEGIN CONTEST SEASON

Fourteen DECA students entered state competition this week, held in Logan on the USU campus, according to adviser Curtis Youngman.

And DelMar Stevens, who leads the VICA organization on campus, reports that there are some 90 students and 14 advisers in the club, and that state competition is getting near.

## COOPERATIVE EDUCATION BECOMES MORE VISIBLE

Utah Tech's Jim Godfrey, cooperative education director, led a 14-person delegation to the annual conference of WACWEE (Western Association of Cooperative and Work Experience Educators).

The 12-states WACWEE gathering was held last weekend in Reno. Jim Godfrey spoke on "Tips on Employer Development" during one of the Saturday p.m. sessions.

Those attending from the college also included Maureen Aylett, Davis Ballard, Bob Beebe, Ron Day, Frankie Ford, Frank Harper, Mike Homer, Linda Metos, Reed Parr, DelMar Stevens, John Udy, Dave Webb, and Elwood Zaugg.

There were some 140 educators present at the meetings.

Mr. Godfrey also reports of increasing interest by employers in the concept of coop education on the local level. During the past week a number of officials from Hill Air Force Base have been on campus conferring with instructors in areas where there might be opportunity for coop experience by students.

## WHAT'S BEING BUILT ON THE REDWOOD CAMPUS?

Facilities director Paul Gundersen keeps projects juggling, trying to stay on top of 'em all.

Among those in process are:

- \* Dual glazing of the Construction Trades building to save energy.

- \* Rooftop make-up air unit for the apprenticeship painting and decorating lab (CT 124).

- \* Bidding of a wall inside the brick wall in the tiered classrooms CT 162, 188, and heating units around the baseboard.

- \* Concrete pad east of the Metal Trades building for parking and storage; and a similar pad west of the building for instructional equipment. Chain fencing and shrubbery to secure and beautify the area, also.

## TWO "W-2" FORMS?

A few people are confused because they have received two W-2 forms from the college.

One reflects taxes withheld on total college earnings. The other has to do with the life insurance policy - paid by the college - for each individual. That insurance, on most individuals, is twice the annual salary. If the insurance coverage is in excess of \$50,000.00, then the coverage is subject to taxation which is payable by the individual.

The college's Life Insurance Endowment Program incurs no obligation on the individual. Benefits accrue to the college in event of an employee's demise while in service to the college.
